AI-Proof Your Resume Before the Bots Reject You

The 150 reset.

Comment "RESUME" for the checklist. #ai #careeradvice

SWIPE →

The reality

Most resumes are screened by software before a human ever reads them.

The fix 1

Mirror the exact language of the job description. Tools match words.

The fix 2

Simple structure, standard headings, no graphics that break parsing.

The fix 3

Quantify outcomes. Numbers survive screening and persuade humans.

06 / 07

The reset

Spend 150 focused minutes rebuilding your resume for both readers.

Do this

Run your resume through a parser today. Save this.
