The job

A simple agent that pulls search data, groups it by intent, and flags the easy wins.

03 / 07

Step 1

Connect a keyword source and a model API.

Step 2

Give it one clear task: cluster by intent, not by phrase.

05 / 07

Step 3

Have it output a short, ranked brief you can act on in the morning.

06 / 07

The rule

The agent proposes, you decide. Never skip the review step.

Do this

Automate the research, keep the judgment. Save this.
