

GEO Is Not a Buzzword

It is the discipline of being cited.

02 / 07

The definition

GEO is optimizing to be quoted, summarized, and referenced by AI answers.

03 / 07

vs SEO

SEO makes you rankable. GEO makes you quotable. You need both.

The signals

Clear answers, named sources, one topic, structured data.

The measure

Not position. Citation: how often the machine repeats you.

The mistake

Treating GEO as new work. It is the same page, optimized for a new reader.

Do this

Add one quotable sentence to your best page. Save this.
