

AI Overviews Ate Search Results

Click-through dropped 58% in one year. Here is what still survives.

What changed

AI Overviews sit above the classic results and answer the question before anyone scrolls.

03 / 07

The damage

Organic CTR fell 58% in a year for the queries that grew an AI Overview.

04 / 07

Who gets hurt first

Informational, definition, and "how to" queries. The easy clicks are gone.

05 / 07

What survives

Original data, first-hand experience, and pages that give something the overview cannot compress.

06 / 07

Your move

Move effort from traffic keywords to decision keywords. Answer, then give the next step only you can give.

The rule

If the AI can fully answer it, stop building a page around it. Save this.
