

AI Mode Wins 93% of Sessions Without a Click

Marketers, read this slowly.

02 / 07

The number

93% of Google AI Mode sessions end without an external click.

What it means

You are not competing for a visit. You are competing for a mention inside the answer.

04 / 07

The trap

Teams still report on rankings. The buyer is reading a summary that never shows a ranking.

05 / 07

What wins

Content that is quotable, current, and tied to a name. The model needs a sentence it can repeat.

06 / 07

Reframe the job

Winning is being the line inside the answer, not being position one below it.

Do this

Search your topic in AI Mode today. If you are not in the answer, that is your to-do list. Save this.
