

Only 36 Brands Stay Visible Across Every AI Platform

Here is the full breakdown.

02 / 07

The finding

Across ChatGPT, Gemini, Perplexity and others, just 36 brands appeared consistently in every set.

03 / 07

Why it is so few

Each engine reads a different source list. Most brands win one and lose the rest.

04 / 07

The pattern

Winners publish the same clear, sourced message across every source the models read.

05 / 07

The gap

45% of marketers cannot measure their AI visibility at all. That is your opening.

What to do

Pick 3 sources you can control, repeat the same claim on all three, and track whether the answer changes.

The move

Consistency across sources, not volume in one. Save this breakdown.
