

9 Categories That Decide Whether AI Even Sees Your Page

Technical SEO in 2026.

The shift

Technical SEO used to be about ranking. Now it decides whether you get read at all.

03 / 07

The 9 categories

Crawlability, indexability, security, URL structure, mobile, Core Web Vitals, structured data, JS rendering, and IndexNow.

04 / 07

The non-negotiable

If the content is not in the HTML at load, some AI crawlers never see it.

The quiet killer

Noindex tags and blocked paths silently remove you from AI answers.

06 / 07

The multiplier

Structured data makes your facts machine-readable. Four or more types correlate with more citations.

Do this

Walk the 9 categories on your own site this month. Save this.
