

A Real SEO Audit Starts With URL Inspection

Not keyword reports.

The mistake

Most audits open a rank tracker. That tells you where you are, not why.

Start here

URL Inspection in Search Console. Can Google even index the page?

The order

Indexability, then technical, then content, then links, then keywords.

Why this order

There is no point optimizing a page the crawler cannot store.

The tell

If you do not open Search Console in the first ten minutes, it is not an audit.

Do this

Run URL Inspection on your ten money pages today. Save this.
