The problem

Business owners know AI could help. They do not know where to start.

The offer

A paid audit: you map their workflows and hand back the top 3 to automate first.

The price

A focused automation audit lands around 1,500 in many markets, and it is the cheapest thing to sell.

Why it sells

You are not promising transformation. You are selling a clear plan and a first win.

The bridge

Most audits turn into implementation work. The audit is the door.

Do this

Package one clear audit offer this week. Save this.
