

AI Social Media Management: Retainer Value Without Extra Hours

Add repurposing to an existing retainer and raise the value, not the workload.

The retainer keeps the same hours while the client gets a week of posts.

Repurposing reuses content the client already paid you to make.

Scheduling removes the daily posting burden.

Monthly reporting comes from the same data set.

Raising the price on value, not on hours, is the play.

Comment "SOCIAL" for the workflow.
