

How to Get Cited by ChatGPT

The 4 signals Semrush found across 89,000 citations.

02 / 07

Signal 1: A clear answer

State the point in the first two lines. Models lift clean sentences.

Signal 2: A named source

Cite the study, the number, the date. Unsupported claims get skipped.

04 / 07

Signal 3: One topic per post

Topical focus beats a post that touches five ideas and commits to none.

05 / 07

Signal 4: Consistency

75% of cited authors posted 5 or more times in four weeks. Frequency is a signal.

The shortcut

Write the sentence you want quoted, first. Then build the post around it.

Do this

Rewrite your best post so the quotable line is line one. Save this for the 4 signals.
