

What the Aug 30 EEA Change Actually Means

Parasite SEO in 2026.

02 / 07

The change

Google stopped applying site-reputation-abuse manual actions inside the EEA.

03 / 07

The scope

It applies in the EU, Iceland, Norway, and Liechtenstein. Outside the EEA the policy still stands.

04 / 07

What did NOT change

The algorithmic enforcement still runs everywhere. That is the part that actually de-ranks pages.

05 / 07

The lesson

A manual-action waiver is not permission. The algorithm does not read press releases.

06 / 07

The safe version

Barnacle SEO. Your own valuable content on a platform you do not own the algorithm of.

Do this

Read the change before you bet a business on it. Save this.
