

Schema Markup Cheat Sheet

Facts AI can read, listed

Organization schema identifies your brand, logo, social profiles, and contact details for machine consumption.

WebSite schema defines your site name, URL structure, and search functionality for crawler understanding.

Breadcrumb schema maps page hierarchy so engines understand navigation and content relationships.

FAQPage schema makes question-answer pairs machine-readable, increasing the chance of citation in AI answers.

LocalBusiness adds address, hours, and service area for location-based queries and AI local results.

**Comment "MARKUP" for the snippets. #schemamarkup
