

What pSEO Looks Like

Programmatic SEO builds pages at scale from structured data. The best examples do not feel templated because each page carries unique, useful information.

02 / 07

Wise: Currency Pages

Wise generates thousands of currency conversion pages, each with live rates, historical data, and transfer cost calculators. Data-as-product.

03 / 07

Zapier: Integration Pages

Zapier builds a page for every app-to-app integration. Each page explains what the connection does, how to set it up, and lists real workflows.

04 / 07

Canva: Template Pages

Canva generates pages for every design template category. Each page shows examples, use cases, and direct links to the editor.

05 / 07

The Common Thread

All three use structured data to generate pages that answer specific user queries at scale. Each page carries enough unique value to earn its place in the index.

06 / 07

720 Monthly Searches

720 people search for programmatic SEO examples monthly. Most are still copying the surface pattern without understanding the data model underneath.

Build Your First One

Identify one data source you own, map it to user queries, and generate your first 100 pages. Save this for the teardown.
