

Google AI Content Policy 2026

Quality over origin, in one sheet

Google rewards quality regardless of whether a human or AI wrote the content. Origin does not determine ranking.

The E-E-A-T bar still applies to AI output. Experience, expertise, authoritativeness, and trustworthiness remain the evaluation standard.

Scaled content abuse targets thin, templated pages produced at volume with no unique value. The pattern is the penalty, not the tool.

First-hand experience signals in AI-assisted content help it pass quality evaluation because they add uncopyable detail.

Comment "POLICY" for the rules. #googleai #seo
