

Local SEO in 2026

AI reads your Business Profile before it recommends you. Searches for this topic hold near 2.9K a month.

Profile First

Your Google Business Profile is the top source a model pulls for any local answer.

Categories Matter

The right primary category decides which local questions your entity is eligible to answer.

Citations Count

Name, address, and phone must match everywhere. Inconsistency is the fastest way to lose trust.

Posts and Q&A

Fresh posts and answered questions train retrieval on what your business actually does.

Reviews Are Fuel

AI summarizes review sentiment into answers. Manage the mix, not just the stars.

Do This Tonight

Pull your profile and your top directories, fix every mismatch, and save this.
