

What SEO Costs in 2026

The honest pricing ladder, tier by tier. 880 searches a month just to check the numbers.

Tier 1: Audit

A scoped audit of indexability, structure, and citations. Fixed price, defined output.

Tier 2: Build

The fixes get done: content, links, technical work, with clear delivery dates.

Tier 3: Monitor

An ongoing retainer for indexing health, citations, and answer tracking.

What Changed

Budgets moved from keyword reports to indexing and citation infrastructure.

The Honest Part

SEO is a build-and-monitor game, not a flat monthly magic fee.

Your Move

Ask for a scoped audit before any retainer. Save this.
