

AI Ad Copy: Where Machines Win

Machine-written ads dominate spend. Nuance and trust are the human edge.

Machines win speed and volume: variants in seconds, tests at scale.

Humans win nuance: tone, culture, and what a brand would never say.

Trust still transfers through a human voice, not a generic template.

A sharp brief turns machine drafts into usable ads.

The winning setup is machine draft, human edit, machine test.

Comment "ADCOPY" for the test sheet. #aiadcopy #ppc
